

Long-Term Healthcare Staffing, simplified.

TRS International specializes in the recruitment and placement of qualified nursing and allied healthcare professionals for direct hire, permanent employment, allowing them to relocate to the U.S. for positions sponsored by your facility.

Why International Staffing?

Hospitals just like yours often struggle to hire and retain qualified staff. We understand and offer multiple recruitment and retention strategies specifically tailored to solve your staffing needs.

International recruitment for direct hire placement in hospitals is an innovative, viable, and cost-effective solution for healthcare's ongoing workforce shortage.

What Makes Us Different?

Our Seamless Support

TRS International makes the complex international healthcare recruitment, hiring, and onboarding process simple and seamless from start to finish so that you can stay focused on operating your facility and providing continuity of quality care.

Our Connections

Not only are we able to source quality candidates for your facility from abroad, but we also work with award-winning immigration attorneys who thoroughly understand the U.S. rules and regulations for international healthcare professional employment. We take the burden off your shoulders.

Our Knowledge & Experience

TRS International is a leader in international direct hire placement for a reason. Our team has over 30 years of experience in international healthcare staffing, so we understand both the intricate immigration process and your hospital's unique requirements for hiring. As your trusted advisor, we're able to source and match the right clinicians with your facility's needs.

Our Value

Unlike other international staffing agencies that require ongoing costs for each candidate they provide, TRS International charges a one-time, all-inclusive fee. After an international healthcare professional joins your facility, they're your employee, not ours.

What Our Clients Have to Say

"The laboratory technologist that was placed by TRS is efficient, punctual, courteous, and more than technically competent. Within a few weeks of arrival, the technologist is a completely self-sufficient functioning member of the laboratory staff. "TRS made the process of selecting qualified candidates efficient and convenient. The procedure was so straightforward that we have selected another candidate to bring onboard to our hospital in the near future."

- Corey W, CEO

"The candidates they presented us with have been thoroughly vetted, very professional [and] polite, and demonstrated a strong work ethic that has been refreshing to see. They have been and continue to be welcomed additions."

- Jaime L., HR Director

Our Process

Sourcing and hiring permanent staff can be a time-consuming and expensive process without help. TRS International is the partner you can trust to work with you. We keep you informed and guide you through the steps so that you have the right healthcare professional talent.

1

Recruit Candidates

We source, prescreen, and present suitable healthcare professionals to you so that all you have to do is interview candidates and present a job offer to your chosen candidate.

3

Relocation Assistance

We meet your healthcare professional at the airport and help them get settled in their new community with housing assistance, coordination of transportation, and more.

2

Immigration Prep

We take the lead on the logistics of bringing your international healthcare professional to the U.S. by working with award-winning immigration attorneys and obtaining Visas.

4

Ongoing Support

We keep in contact with your facility to ensure your healthcare professional meets your direct hire needs and that you continue to have a positive staffing experience.
